24 h + 7 d
1C
ARM

## Schneider RElectric

■ Function: the time switch automatically opens and closes a circuit according to a weekly and daily program established by plugging jumpers onto a moving dial. It is designed to operate a load according to a daily program, only in half-days (morning and afternoon) selected in the week.

Applications

## Programming

- Series connection of the 2 output contacts ensures daily operation ( 24 h contact) repeated in time brackets selected in half-days. The half days are in turn selected in the week.
- The yellow jumpers must be used for 24 h
programming (on/off in turn) (terminals 1-2-3).
- The fixed blue and red switches (7) and (8) must be used for 7 d programming (on/off in turn) (terminals 4-5-6).
- Setting limits:
- Gap between 2 slots $=15 \mathrm{~min}$
$\square$ Gap between 2 jumpers $=45 \mathrm{~min}$.

## Setting

- Turn the graduated dial in the direction shown to bring the figures for the required day and hour opposite the fixed mark (6). ■ Check proper operation of switching by rotating the switches (1) and (2).
- The quartz motion (ARM) starts after a few minutes.

Schneider Electric Industries SAS 35 rue Joseph Monier

## Modifying

You can manually reverse the existing program by reversing the position of switches (7) and/or (8).

## ■ Caution!

Do not forget to put the switches back in their initial position to recover the existing program.

## Characteristics

■ Supply voltage: $230 \mathrm{~V} \pm 10$ \%

- Frequency: $50 / 60 \mathrm{~Hz}$
- Rating: $10 \mathrm{~A} / 250 \mathrm{~V} \sim \cos \varphi=1 ; 4 \mathrm{~A} / 250 \mathrm{~V} \sim \cos \varphi=0.6$
- Consumption: 2.5 VA
- Quartz motion
- Operating reserve: 150 hours

■ Minimum time between 2 switchings: 45 min

- Type of setting: 1 B STU according to EN 60730
- Operating temperature: $-10^{\circ} \mathrm{C}$ to $+50^{\circ} \mathrm{C}$
- Terminal capacity: $6 \mathrm{~mm}^{2}$
- Overall dimensions: 6 modules of 9 mm .

Acceptable power

| incandescent lamp 230 V | 1100 W |
| :--- | :--- |
| halogen lamp 230 V V | 1100 W |
| non compensated fluorescent tube/serial compensated <br> fluorescent tube with conventional ballast | $15 \times 40 \mathrm{~W}-10 \times 58 \mathrm{~W}-6 \times 100 \mathrm{~W}$ |
| parallel compensated fluorescent tube with <br> conventional ballast | $2 \times 40 \mathrm{~W}(4.7 \mu \mathrm{~F})-1 \times 58 \mathrm{~W}(7.0 \mu \mathrm{~F})$ |
| dual-mounted fluorescent tube with conventional ballast | $5 \times(2 \times 58 \mathrm{~W})-3 \times(2 \times 100 \mathrm{~W})$ |
| paralle compensated sodium vapour lamp | relay by contactor CT |
| parallel compensated HQL fluorescent balloon | relay by contactor CT |
